In high demand are individuals with the skills to repair wrecked or damaged auto body parts. Automotive Collision Technicians restore vehicles damaged as a result of collision, corrosion or wear. This program is certified by Automotive Service Excellence (ASE), and students are trained and tested according to ASE standards.

This program trains students to refinish surfaces through painting or spot painting. Course content includes: safety, non-structural repair, structural repair, welding and cutting, refinishing, estimating, plastic repair and mechanical and electrical repair.

Career opportunities for students choosing Automotive Collision Technology may include: automotive painter, detailer, estimator, frame specialist, and body repair specialist. More information on this program can be obtained at [www.nwtechonline.com](http://www.nwtechonline.com) or by contacting Jeff Owen at (580)327-0344.

# AUTOMOTIVE COLLISION TECHNOLOGY - ALVA

This course provides students with training to repair or replace auto body parts using hand and power tools. Students also learn to refinish surfaces through painting or spot painting. Auto Collision Technicians restore vehicles damaged as a result of collision, corrosion, or wear. Some of the topics covered include safety, non-structural repair, structural repair, welding and cutting, refinishing, estimating, plastic repair and mechanical and electrical repair.

The program is Automotive Service Excellence (ASE) certified, and the students will be trained and tested to ASE standards.

Auto Collision students have the opportunity to participate in a student organization, Skills USA, which promotes leadership development and skill competition at the local, state, and national level. Development of good attitudes and teamwork are vital for those employed in any field.
